

1.5 kw solar inverter factory in Angola

Overview

Who owns solar power in Angola?

The asset is owned, run and financed by French energy giant TotalEnergies in partnership with Sonangol and local renewables company Greentech - Angola Environment Technology. In May 2022, President Lourenço approved a contract worth USD 1.02 billion for the development of new solar projects with the aim of electrifying 60 communes.

How many MW of solar energy will be installed in Angola?

Under the agreement, Sun Africa will develop 728 MW of solar mini-grids to provide electricity to more than 2 million people in southern Angola. The investment represents the largest mini-grid energy project in Africa.

Is Angola developing a solar power project?

Angola is currently developing several solar power projects that tie in to the country's Angola Energy programme and its environmental commitments. Among current developments is a mega-project consisting of seven photovoltaic plants that will be commissioned by Q2 2023 and additional projects funded by the Angolan and US governments.

Will Angola get 70% of its energy from renewables by 2025?

These initiatives are backed by President João Lourenço, who at COP26 in November 2021 stated that Angola aims to source 70% of its energy from renewables by 2025. The solar projects include those connected to the grid and smaller off-grid developments to electrify isolated communities in Angola.
