

LLSE CONTAINERS

100ft Dublin Energy Storage Container for Rural Use

Overview

What is energy storage Ireland?

Energy Storage Ireland is a representative association of public and private sector organisations who are interested and active in the development of energy storage in Ireland and Northern Ireland. Delivering the energy storage technologies to enable a secure, carbon free electricity system on the island of Ireland by 2035.

How can storage technology support the electricity system in Ireland?

Storage technologies are already playing an important role in supporting the electricity system in Ireland. The combined storage capacity currently connected to the grid in Ireland is approximately 792MW. This consists of approximately 500MW lithium-ion batteries, with an average duration of less than one hour, providing system services.

What is Ireland's energy storage framework?

The framework recognises that the energy storage landscape is rapidly evolving. While Ireland currently relies primarily on battery storage and the Turlough Hill Power Station in County Wicklow, new technologies are emerging that could play a key role in the future.

What is energy storage Ireland (ESI)?

1. Introduction Energy Storage Ireland (ESI) is a representative association of over 70 public and private sector organisations who are interested and active in the development of energy storage in Ireland and Northern Ireland.
