

10kW Off-Grid Solar Container Used in Shopping Mall

Overview

Why do shopping malls need solar energy?

Solar energy for shopping malls has abundant benefits for both the shopping mall and the local community. Occupying large spaces around the city, shopping malls consume enormous amounts of electricity, going off grid and installing solar energy solutions is not only a benefit during the current energy crisis but also long term.

Why do South Africa's shopping malls use solar panels?

In South Africa, where much of the power produced is from fossil fuels, installing solar panels and going green promoted an eco-friendly business. Solar panels guarantee free electricity for up to 25 years if well maintained. By transitioning to solar energy, shopping malls play a pivotal role in reducing the city's carbon footprint.

Are solar panels a good investment for retail?

Sectors such as hospitality and retail, who are heavily reliant on continuous power experience a dip in foot traffic and reduced consumer spending during load shedding periods, further impacting their financial health. With the addition of solar panels, barriers to retail revenue loss will no longer exist. Solar panels are cost efficient.
