

10kw three-phase wind power grid-connected inverter

Overview

What is a small type wind grid tie power inverter?

The small type wind grid tie power inverter can obtain the wind energy from wind turbine, and can tie to the grid through its output cables with no extra equipment. The installation is very convenient and reliable. We call the system combining with small grid tie inverter and wind turbine as 'SGWT'.

What is a 30kW grid tie solar inverter?

Quality 30kW on grid tie solar inverter converts 200-820V DC to 3 phase 208V-480V output voltage, supports 2 high efficiency MPPT tracking inputs. Grid tie inverter 3 phase adopts with transformerless design, LCD, convenient for the user to monitor main parameters and configure.

What is a 10kW on-grid inverter?

A 10kW on-grid inverter is specially designed to add extra electricity to your system. It generates enough electricity to meet your daytime needs and saves excess electricity for later use at nighttime.

What is an on-grid 5kW inverter?

An on-grid 5kw inverter is easy to maintain and converts the direct current to alternating current for powering domestic appliances and even commercial equipment. These solar inverters typically offer high efficiency of around 93% to 96%. Also, the warranty period of these inverters is around 5-10 years.
