

# 12v external charging inverter

## Overview

---

Can you use a 12V rated inverter charger to power a battery?

You can use a 12V rated inverter charger to power it. The maximum capacity is 600ah, similar to the series. The difference is the voltage because in a series connection it goes up to 36V. If batteries are in a parallel connection, the inverter charger must supply the current needed by every battery.

What is a power inverter with a built-in battery charger?

Power inverters with built-in battery chargers provide a reliable uninterruptible power supply (UPS) for homes, offices, and off-grid systems. These advanced inverter chargers automatically switch between battery power and utility AC power, ensuring that your appliances and electronics continue running during a power outage.

Which power inverter chargers are available?

Inverters R Us carries a full line of power inverter chargers, including those manufactured by: Aims, Go Power!, KISAE, Magnum Energy, Samlex America, Spartan Power, Tripp Lite and Xantrex. Inverter chargers typically have a built in transfer switch that will sense when you are plugged into an AC source such as shore power or a generator.

What is an inverter charger?

An inverter charger is a device that converts DC power from batteries to AC power, while also charging the batteries. All our Inverter Chargers from Sunshine Solar are pure sine wave inverters and generate an output voltage wave form that has a very low harmonic distortion, similar to mains supplied electricity.
