

# **15kW Mobile Energy Storage Container Used in Mexican Refinery**

## Overview

---

Will energy storage attract renewables investment in Mexico?

With Mexico's president-elect having announced an intent to attract renewables investment, energy storage was the subject of much discussion at the Intersolar Mexico trade show.

Why is energy storage important in Mexico?

Renewable energy resources like solar and wind fluctuate, making energy storage systems (ESS) important for balancing supply and demand. In Mexico, which has abundant solar and wind resources, energy storage facilitates the efficient use of generated renewable electricity. It smoothes out the variability and ensures a stable power supply.

Can electric energy storage systems be used in Mexico?

Within the scope of the GIZ analysis about the economic condition for the use of Electric Energy Storage Systems (EESS), in Mexico in general, and in the Mexican isolated grid of Baja California Sur in particular, an analysis has been carried out on the potential of these LTA.

Will Mexico generate 54% of its electricity from renewables?

President-elect Claudia Sheinbaum Pardo has already announced a national energy plan focused on driving renewables investment, expanding electromobility, and modernizing ageing grid infrastructure with the aim of Mexico generating 54% of its electricity from renewables, up from 12.1% today.
