

192V15KW single-phase inverter

Overview

What is a 15kW IGBT inverter?

15kw IGBT materials single phase pure sine wave power inverter Pure sine wave power inverter; Solar inverter, Wind inverter, Home inverter, Household inverter Foshan Tanfon Energy Technology Co.,LTD which a manufacturer for Foshan Tanfon Energy Technology Co.,LTD which a manufacturer for solar system products, wind turbine system products.

How does a solar inverter work?

2.battery power priority: when it have sun power, just charge sun power to battery, and take the load, when it has not sun power, inverter will use battery power take the load. when battery power is lower, inverter will automatically use bypass function to take the load, and charge to battery at the same time.

What is the difference between a solar inverter and a city power?

1.the city power priority: when it have city power, inverter will work bypass output, city power take the load directly; when have both city power and sun power, inverter will charge 2 kinds power to battery. when city power failed, just charge solar power to battery .
