What is a solar inverter?

The solar inverter is mainly a solar panel that receives solar energy and then converts it into electric energy through an inverter. Generally, only those areas with abundant sunshine will recommend solar power generation equipment.

What is the output voltage of grid off inverter?

The output voltage can be set between -40 % to +20 % of rated voltage. And the output voltage of grid off inverter is very accuracy  $\pm 1\%$ . Off grid solar power inverter often used in electric vehicle and train system. 200kW pure sine wave inverter without battery for solar power system, three phase, converts DC power to AC power.
