## Overview

---

Is this 5000 watt inverter safe to use?

Safe to Use this ETL Listed 5000 watt inverter. This 5000 Watt inverter has been approved by ETL with UL458 standard. Which will provide users better technical support and apply to more devices with confidence .

How much power does an inverter need?

It mainly depends on the total power of the device you want to use with the help of the inverter. If a 1450W coffee machine is connected, the minimum power of the inverter must be 1500W. It is necessary to consider starting the peak, for example, the power of the refrigerator is 3-5 times higher than its rated power in order to operate.

How do I Choose an inverter?

The inverter is designed to momentarily provide the rated high demand (e.g., surge power) before returning to the inverter's continuous power rating. When selecting an inverter, ensure that the total power needed for all devices to be connected to the inverter is below the continuous (first) power rating of the inverter.

What is a power inverter used for?

This power inverter lets you run power tools, small appliances, and electronics during a camping trip, roadside stop, or power outage by using your vehicle's battery. This power inverter features a high-surge capacity for products that require power up to 10,000 watts to start and an LED readout to monitor amps and voltage. Not for marine use.
