

# **500kWh photovoltaic energy storage container in the Middle East**

## Overview

---

Is large-scale energy storage a viable option in the Middle East?

Until recently, large-scale energy storage was barely a consideration in the Middle East, where fossil fuels have long dominated power generation. With renewable energy projects expanding across the region, energy storage has started gaining traction.

How long can a solar power plant store energy in MENA?

The proposed facility is designed to store energy for up to 12 hours. The MENA region is also home to a number of Concentrated Solar Power (CSP) plants that offer cost-effective, utility-scale thermal storage. Dubai's Noor Energy 1, a 950 MW hybrid CSP and PV plant, is the world's largest single-site hybrid solar project.

Will Oman launch a 100 MW solar PV plant in 2025?

In 2025, Petroleum Development Oman is expected to launch the 100 MW North Solar Storage PV plant, featuring the country's first lithium-ion battery system to ensure energy transmission beyond daylight hours with a 100 MW peak capacity.

Which countries are deploying a 300 MW solar PV system?

In Egypt, AMEA Power recently signed power purchase agreements to develop the nation's first utility-scale BESS project, a 300 MWh system. The BESS project is an addition to the 500 MW Abydos solar PV project under construction. Meanwhile, UAE's EWEC has recommended deploying 300 MW/300 MWh of BESS capacity within the next three years.
