

# 50kW PV combiner box

## Overview

---

What is a DC combiner box?

Our DC combiner boxes offer users the possibility to integrate short-circuit and overvoltage protection, as well string monitoring solutions (I,V, T and SPD and switch isolator status), for PV systems using central inverters with PV panels in trackers and fix tilt systems.

What is a 600v DC combiner box?

600V DC combiner box is LETOP's economical solution designed for small PV systems. It offers 1-6 string inputs and 1-2 string outputs. Supports 600V DC system voltage. It also uses high-quality components to ensure overcurrent and overvoltage protection. Suitable for 5kW-10kW small residential rooftop or small commercial PV systems.

What is a photovoltaic AC combiner box?

The photovoltaic AC combiner box is used in a photovoltaic power generation system with string inverters and is installed between the AC output side of the inverter and the grid connection point/load. It is internally equipped with input circuit breakers, output circuit breakers, and AC lightning arresters.

How many inverters are in a 400v/50kw AC combiner box?

Taking the AC combiner box with 4 in 1 (400V/50KW) as an example, there are a total of 4 inverters of 50KW: Label 1: The output end of the inverter is directly connected to the 4P circuit breaker. The circuit breaker can quickly cut off the fault current. The maximum AC output current of the inverter is 80A.
