

5MW Italian Mobile Energy Storage Container

Overview

What is 5 MWh utility storage?

The 5 MWh Utility Storage represents the latest and most advanced in the Utility Storage family of products with the highest energy density and enhanced features such as a wider operating temperature range than its predecessors.

Does Italy have a new battery energy storage system?

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia.

How is Italy transforming its energy system?

Italy, like much of Europe, is undergoing a rapid transformation in how it generates and distributes energy. With solar PV and wind power ramping up quickly, grid operators are increasingly reliant on energy storage systems to manage variability and avoid curtailment of renewable energy during periods of oversupply.

What is the largest grid-connected storage system in Europe?

In particular, the Blackhillock project in Scotland, with 300 MW/600 MWh, is today the largest grid-connected storage system in Europe and capable of guaranteeing grid stability exclusively through batteries. Sma took care of the engineering, plant control integration and grid studies to prove its effectiveness.
