

ASEAN solar Energy Storage Solution

Overview

What is the ASEAN Energy Centre?

The Centre accelerates the integration of energy strategies within ASEAN by providing relevant information and expertise to ensure the necessary energy policies and programmes are in harmony with the economic growth and the environmental sustainability of the region.

Does ASEAN have a potential for solar power?

ASEAN has significant potential for solar power, particularly in the Mekong countries of Myanmar, Thailand, and Cambodia. The potential for solar PV at sites with an LCOE of less than US\$150/MWh has been estimated to exceed 30 TW (Lee et al., 2019).

Why does Southeast Asia need flexible energy storage solutions?

Southeast Asia's exponential growth in electricity demand, averaging over 6% annually over the past two decades, has created an urgent need for reliable and flexible energy storage solutions. This surge in demand is primarily driven by increasing ownership of household appliances and rising consumption of goods and services across the region.

Why is the Philippines a leader in battery energy storage?

The country's leadership position is driven by its progressive energy policies and ambitious renewable energy integration goals. The Philippines has established itself as a pioneer in battery energy storage system (BESS) deployment, with multiple large-scale projects under development across its various islands.
