

Amsterdam rooftop solar panels

Overview

How many solar panels can be installed on Amsterdam roofs?

The tool calculates that a total of 3.250.000 solar panels can be installed on Amsterdam rooftops. That means in Amsterdam there's room to potentially install 6.5 times as many photovoltaic (PV) systems than the 500,000 currently installed on the city's roofs.

Can a million solar panels be installed in Amsterdam?

If you have a house, you have a roof and you can install solar panels. But if your ambition, like Amsterdam, is to push the transition towards renewable energy by having a million solar panels installed, it becomes a large-scale urban planning puzzle.

Can solar panels help Amsterdam achieve its green ambitions?

One that not only involves rooftops and lines of sight, but also the underground electrical grid and even the drainage of rainwater. Before Maarten Verkou got involved in helping the city of Amsterdam achieve its green ambitions, he researched the optimal use of solar panels at a much smaller scale.

How many solar panels will Amsterdam have by 2040?

The municipal government aims to equip around 500,000 home with PV systems by 2040. Amsterdam now hosts more than 1 million solar panels across 120,000 households, for a total capacity of around 250 MW. The municipal government said the number of solar modules deployed in the city has more than doubled in 2.5 years.
