

Arc flash switchgear for sale in Brisbane

Overview

What is arc flash protection in a substation?

The main purpose of arc flash protection in a substation is to protect both personnel and equipment from the consequences of an arc fault. Arc flash faults are the most devastating types of faults known in power distribution systems.

What is aq-100 arc flash protection?

AQ-100 Arc flash protection series offers a complete solution that focuses on simplicity while maintaining both flexibility and function.

What is arc flash protection?

Arc flash protection detects electrical arcs in MV and LV equipment and quickly isolates power to limit arc energy and minimize risks.

What is arc quenching switchgear?

Arc Quenching Switchgear minimizes or eliminates damage to switchgear in the event of an arc fault, protecting valuable switchgear assets from arc flash damage. It is designed to reduce peak fault current by at least 25% and peak stress on upstream equipment by at least 44% when compared to a bolted fault device.
