

Are solar shingled panels good

Overview

Are solar panels better than shingles?

Shaded yards, flat roofs, or small surfaces limit solar shingles' potential. Panels adapt with racks or ground mounts; shingles need the right slope and sun exposure to shine. To make sense of your options, here's a comparison table: Takeaway: Panels win on cost and efficiency; shingles take aesthetics and integration.

What are solar shingles?

Solar shingles are roof shingles made of photovoltaic (PV) cells, the same electricity-generating material on solar panels.

Are solar shingles worth the price?

Solar shingles are probably worth it if you're already replacing your roof and are concerned about solar panel aesthetics. However, they tend to cost more and don't perform as well as solar panels.

How efficient are solar shingles?

The average solar shingle efficiency rating is around 19 to 20%. It is lower than some of the most efficient solar panels on the market. Keep in mind that since solar shingles are installed as part of your roof, they can't be angled like solar panels, which can be adjusted for optimal sun exposure.
