

# **Are there any restrictions on solar inverters in Cape Verde**

## Overview

---

Does Cabo Verde have electricity?

Imported petroleum products constitute about 80 percent of Cabo Verde's total energy supply, while less than 20 percent comes from renewable sources, primarily wind and solar. Although 93 percent of the population has access to electricity, there are significant losses in the distribution grids, and electricity costs are extremely high.

What is the Cabo Verde national energy policy?

In 2008, the Council of Ministers approved the Cabo Verde National Energy Policy which sets out the overarching vision of achieving long-term independence from fossil fuels by promoting renewable energies and improving energy efficiency.

Do I need a voltage converter in Cape Verde?

You don't need a voltage converter on Cape Verde. To be sure, check the label on your devices. Some devices never need a converter. If the label states 'INPUT: 100-240V, 50/60 Hz' the device can be used in every country in the world. This is common for devices with chargers like tablets/laptops, photo cameras, cell phones, toothbrushes, etc.

What percentage of Cabo Verde's energy comes from imported petroleum products?

Includes a market overview and trade data. Imported petroleum products constitute about 80 percent of Cabo Verde's total energy supply, while less than 20 percent comes from renewable sources, primarily wind and solar.
