

# **Are there solar panels on household roofs in Shanghai**

## Overview

---

What drives the growth of residential rooftop solar in China?

The growth of Residential rooftop solar (RRS) in some western countries has predominantly been driven by individual or market behaviour and has been extensively studied. However, the development landscape of RRS in China differs, and its driving mechanisms remain unclear.

Could China's rooftops and buildings match global solar capacity?

Rooftops and buildings in China fitted with solar panels could match the current global capacity of the entire industry, according to new analysis.

Does China have solar energy?

Growth, cost, and subsidy for residential rooftop solar in China from 2015 to 2021. Solar energy in China has two types, concentrated solar and distributed solar, where distributed solar consists of commercial solar and RRS.

What is residential rooftop solar?

1. Introduction Residential rooftop solar (RRS) for electricity generation is essential in the new power system and vital during the low-carbon green energy transformation, which is being adopted globally (Moore and Bullard, 2021). In recent years, China's RRS has been expanding rapidly, with the annual growth rate ranking first in the world.
