

Armenian Photovoltaic Folding Container Earthquake-Resistant Type

Overview

What is a folding solar photovoltaic container?

The folding solar photovoltaic container developed by the Huijue Group represents a pioneering, flexible, and effective solution in energy provision. Besides meeting the demand of energy in different scenarios, this container will enable optimized utilization of resources by introducing module design and a powerful electricity generation system.

What is a solar PV container?

The Solar PV container is a mobile, plug-and-play solar energy solution. It's designed to be foldable, integrated for fast deployment anywhere. Just lay the track, pull it gently, and the solar panels will be deployed. Start working efficiently, keeping up continuous conversion of solar energy to electricity.

Can a photovoltaic container be installed on abandoned land?

Industrial and commercial users can take advantage of idle abandoned land or open space to install photovoltaic containers and flexibly adjust the deployment location. In case of changes in the site, the photovoltaic container can be easily migrated.

How photovoltaic panels can be used in bad weather conditions?

In bad weather conditions, the photovoltaic panel can be quickly retracted or deployed to ensure high system safety. Besides, the module array inside the container is factory-pre-assembled and wired, which will greatly simplify the field deployment process. Reduce diesel consumption to support sustainable development.
