

Athens backup uninterruptible power supply

Overview

What is an uninterruptible power supply (UPS)?

An Uninterruptible Power Supply (UPS) is a device designed to provide backup power when the primary power source fails or when voltage levels drop below acceptable limits. UPS systems are commonly used in computers, server farms, and data centers to ensure uninterrupted operation and protect digital data from power-related disruptions.

What is a UPS battery backup?

When power is interrupted, or fluctuates outside safe levels, a UPS will instantly provide clean battery backup power and surge protection for plugged-in, sensitive equipment. APC, our flagship brand, offers UPS options for computers, peripherals, networks, servers, as well as data centres, and facilities. Need help choosing a UPS battery backup?

.

Do you need a battery system to backup your ups power supply?

For mission critical applications, having a reliable battery system to backup your UPS power supply is essential to supporting your critical load during a power quality event.

Are battery-backed uninterruptable power supplies reliable?

Reliability of power sources is an increasing challenge in many sectors and battery-backed uninterruptable power supplies (UPS) are one option to protect and keep electronic equipment operating in the event of grid power failure.
