

# Australia Sydney Energy Storage New Energy Project

## Overview

---

AGL has broken ground on its \$800 million (USD 530.8 million) Tomago battery project being built in the New South Wales (NSW) Hunter region, saying the four-hour duration energy storage system will support more renewable energy generation in the region and enhance grid stability. Who approved acenergy's battery energy storage system in Australia?

The NSW Independent Planning Commission has approved ACEnergy's 250MW/1,100MWh Yanco battery energy storage system in Australia.

Where is acenergy's battery energy storage system located?

Image: Leeton Shire Council. The New South Wales (NSW) Independent Planning Commission has approved ACEnergy's 250MW/1,100MWh Yanco battery energy storage system (BESS) in Australia. The project, designated as a State Significant Development, will be located 5km south of Leeton, around 500km west of the state capital, Sydney.

What is Maryvale solar & energy storage system?

The Maryvale Solar & Energy Storage System will support a reliable renewable energy by enhancing grid stability and efficiency. The system will offer dispatchable renewable energy by firming its own solar output and dispatching it into the grid when it is most needed.

How can a customer storage product reduce energy costs?

The Project aims to overcome barriers to energy storage by enhancing grid stability, enabling community access to battery storage through the customer storage product, alleviating customer solar export curtailment and reducing household electricity costs via a customer storage product.
