

# **Australian Folding Container Corrosion-Resistant Type**

## Overview

---

Are relocatable chemical storage containers corrosive?

Our durable corrosive substance storage range is designed for indoor use, whilst our relocatable chemical storage containers are ideal for the outdoor storage of corrosive substances. All storage solutions are fully compliant with Australian standards.

What is a corrosive container?

Their shipping containers require special materials and design considerations that shield radiation and protect handlers from exposure. Corrosives make up Class 8, and they are substances that can cause severe damage to living tissue, other materials, or the environment upon contact.

Are poly storage boxes corrosion resistant?

**Corrosion Resistance:** Unlike steel or aluminium, our poly storage boxes are corrosion-resistant, ensuring they remain in top condition even in harsh environments. **Versatile Solutions:** Our poly storage boxes effectively cater to diverse storage needs with a variety of sizes, shapes, and customisable options.

What are corrosive goods storage cabinets?

Corrosive substances like acids and alkalis pose a significant risk to both people and equipment if not stored properly. Corrosive goods storage cabinets are designed specifically to provide safe and secure containment for these hazardous materials in work environments such as warehouses, manufacturing, laboratories, and chemical facilities.
