BESS the new Italian solar container outdoor power

Overview

Are battery energy storage systems needed in Italy?

Therefore, battery energy storage systems (BESS) are needed in Italy. The Italian market for BESS is growing rapidly and currently amounts to 2.3 GW but it almost exclusively consists of residential scale systems, associated with small scale solar plants, having an average capacity of less than 20 kWh.

What is a Bess project in Italy?

54.4 MW BESS in Santeramo in Colle, Apulia – awarded to Jupiter Srl, this project adds crucial storage capacity in one of Italy's sunniest regions, rich in solar PV resources. 50 MW “Stornara” BESS in Foggia, Apulia – developed by Atlas Storage 5 Srl, the project reinforces the southern grid's capacity to absorb excess renewable production.

How much Bess capacity will Italy have by 2030?

That is why Italy aims to add 15GW of BESS capacity by 2030 (of which 11GW should be standalone and 4GW co-located). As of March 2025, Italy has got 1GW of grid-scale BESS capacity online, placing the country in third place in Europe (shared with Ireland) in terms of installed capacity, behind Germany (1.6GW) and the UK (5.6GW).

How much energy storage capacity does Italy have?

As of November 2024 Italy had 5.1 GW / 11.7 GWh of energy storage capacity. This is almost exclusively small-scale residential system, with utility-scale storage systems providing just 864 MW. To help achieve the target for utility-scale storage build-out, the Italian government has implemented the MACSE subsidy scheme as supporting legislation.
