

# **Belgian household solar energy storage**

## Overview

---

Will Belgium allow plug-in solar panels & batteries to connect to the grid?

Beginning in May 2025, Belgium will allow plug-in solar panels and batteries to connect to the grid, a move poised to transform residential energy use. This new framework will make it easier for households to integrate solar energy through mobile, plug-and-play devices.

When will solar panels & batteries be available in Belgium?

Belgium's transmission and distribution system operator says it plans to allow household solar panels and batteries with a plug and socket to connect to the grid from May 2025.

Is Belgium making solar energy more efficient?

Energy Minister Zuhal Demir supports this with an 800-watt limit per household to ensure safety and efficiency. According to the officials, Belgium is making it easier for people to use solar energy. New plug-in solar panels, also called balcony solar panels, are now available.

Can you use solar energy on a balcony in Belgium?

According to the officials, Belgium is making it easier for people to use solar energy. New plug-in solar panels, also called balcony solar panels, are now available. These small panels can be easily put up on balconies, windows, or small outdoor spaces. They mentioned that people who rent or don't have a roof or garden can now use solar energy.
