

# **Berlin exports solar modules to enterprises**

## Overview

---

How many solar modules are made in Germany?

For the first quarter, the Federal Statistical Office reports a drastic decline in modules manufactured in Germany to just under 495,600. From pv magazine Germany In 2023, Germany imported nearly €3.6 billion worth of PV systems, primarily solar cells and modules.

How much solar energy did Germany import in 2023?

In 2023, Germany imported nearly €3.6 billion worth of PV systems, primarily solar cells and modules. Compared to the previous year, the value fell by 12.5%, the Federal Statistical Office (Destatis) reported Monday. PV imports continued to decline sharply in the first five months of the year compared to the same period last year.

How many solar PV modules did Europe import from China?

Credit: SolarPower Europe Europe imported around 33GW of solar PV modules from China in the first four months of 2024, representing 43% of total Chinese module exports, according to US energy analyst Clean Energy Associates (CEA).

Are solar photovoltaic modules safe in Germany?

In Germany, solar photovoltaic modules are certified according to European Norm (EN) standards. Manufacturers must comply with the "safety class II" norms that certify the electrical safety of photovoltaic modules.
