Brasilia solar power generation panel assembly

Overview

Is Brazil ready for solar energy?

Brazil has a great potential for solar energy generation, but this is still a developing market. In 2012, the Brazilian Electric Energy Agency (ANEEL) published a new resolution (482/2012) to aid the connection of renewable energy systems to the distribution grid.

What is the Brazilian Atlas of solar energy?

The Brazilian Atlas of Solar Energy provides a survey of the solar energy availability in Brazil, using over 17 years' satellite data and a radiative transfer model.

Does Brazil have a potential for photovoltaic energy?

During the era of isolated systems, some companies began to recognize Brazil's potential for photovoltaic generation. But it wasn't only the private sector that became interested in this source—the public sector also began seriously considering the possibility of expanding the electricity matrix with photovoltaic solar energy.

How many solar power systems are there in Brazil?

As of June 30, 2025, total solar electric generating capacity in Brazil was 23% of the total electric generating capacity. Home and building owners installed more than 3.7 million renewable distributed generation systems in Brazil as of June 30, 2025.
