Brunei Electricity Company Phase Change Energy Storage

Overview

How can Brunei improve energy infrastructure & renewables?

Brunei's efforts to enhance energy infrastructure and renewables are in line with the ASEAN Power Grid (APG) initiative that aims to integrate cross-border power. Other initiatives like smart metering and efficiency labeling could reduce business costs and attract investment in technology and digital infrastructure.

Will Brunei bring new power plants online by 2027 – 2028?

To address this, the government plans to bring new power plants online by 2027–2028 using Combined Cycle Gas Turbine (CCGT) technology, pushing efficiency past 35%. Alongside infrastructure upgrades, Brunei's climate policy mandates a minimum efficiency of 48% for new plants and aims for 30% renewable energy, primarily solar, by 2035.

Why is Brunei focusing on developing downstream energy industries?

The country is focusing on developing downstream energy industries by maximising economic spin-off potential from upstream production and assets. Brunei Darussalam aims to reduce its energy intensity by 45% in 2035 from the baseline year of 2005, in line with its regional commitment to the Asia-Pacific Economic Cooperation.

How is electricity used in Brunei Darussalam?

Electricity can be generated in two main ways: by harnessing the heat from burning fuels or nuclear reactions in the form of steam (thermal power) or by capturing the energy of natural forces such as the sun, wind or moving water. of total generation
