## Overview

---

What is cadmium telluride (CdTe) photovoltaic glass?

Cadmium Telluride (CdTe) photovoltaic glass is a type of solar photovoltaic glass that incorporates thin-film photovoltaic technology based on the semiconductor compound cadmium telluride.

What is cadmium telluride PV?

Cadmium telluride PV is the only thin film technology with lower costs than conventional solar cells made of crystalline silicon in multi-kilowatt systems.

What is a Cadmium Telluride (CdTe) window?

Cadmium Telluride (CdTe) windows are ideal for use in low power CO<sub>2</sub> systems or in spectroscopy applications requiring longwave IR transmission. Cadmium telluride is a water insoluble material and is relatively low cost compared to infrared materials with similar transmissivity, such as diamond.

Are cadmium telluride solar panels dangerous?

(Supplied: First Solar) Ms LaBlack is concerned about the heavy metals in all solar panels, but cadmium telluride (CdTe) panels are a particular concern because of the significant human health concerns about cadmium.
