

Can I bring a Guinea solar container lithium battery pack

Overview

Though widely used, lithium ion and lithium polymer batteries are classified as Dangerous Goods by the International Air Transport Association (IATA) as they're highly flammable, react sensitively to environmental factors, and can cause fires if damaged. Are lithium batteries shipped in a container?

There are three packaging categories for lithium batteries if they are being shipped in a container. When shipping lithium batteries, it is crucial to check the rules and regulations ahead of transportation, or work with an experienced shipping partner to ensure that your cargo is shipped following best practices.

What are the shipping requirements for lithium batteries?

Some general shipping requirements to transport lithium batteries internationally include: Lithium batteries weighing over 35kg must be approved by the national authority of the shipping and destination country before shipment. Defective or damaged lithium batteries must not be transported.

Are lithium batteries allowed in airplanes?

Cargo aircraft only restrictions apply to specific configurations. Damaged, defective, or recalled batteries are banned from air transport. DOT mandates hazardous materials training for employees handling or shipping lithium batteries. The U.S. Postal Service (USPS) prohibits standalone lithium batteries in international shipments.

Can You Send batteries in a shipping container?

The following regulations apply when you are relocating possessions, including batteries, in a shipping container. This also includes a shared shipping container - often referred to as groupage. When you need to send regular lithium metal batteries such as AA or AAA batteries, you need to send them in a hard plastic casing.
