

Can solar panels be directly covered on the roof

Overview

Can solar panels be installed on a commercial roof?

If you're considering installing a residential or commercial solar panel system, you might wonder if your roof type is appropriate for a solar installation. The good news is that solar panels can be installed on just about any roof type, but the installation process and mounting hardware might vary from material to material.

Should I install solar panels on an older roof?

Consider Installing a New Roof: Installing a new roof that lasts as long or longer than the expected service life of the solar array is usually the most prudent decision. Installing solar panels on an older roof is not recommended, as it will likely need to be replaced before the PV system.

Can solar panels be installed on a wood roof?

Like asphalt shingles, installing solar panels on a wood or cedar roof mainly consists of drilling into a roof stud and slipping flashing under the wood pieces to prevent leaking.

Can you install solar panels on asphalt shingle roofs?

Asphalt is perhaps the most popular roof material – as such, asphalt shingle solar panel installations are common and straightforward. Installers will drill studs into your roof and attach panel mounts at those locations.
