

Charging pile energy storage brand

Overview

What is a charging pile?

1.Charging pile refers to a charging device with a charging gun and a human-machine interface, which is simply an electrical device that can be charged, either in one piece or in a split type. 2. Charging pile refers to a cluster of power sources that change AC to DC and requires the configuration of a corresponding charging pile as the output.

What is the difference between charging pile and charging stations?

1.Charging pile refers to a charging device with a charging gun and a human-machine interface, which is simply an electrical device that can be charged, either in one piece or in a split type.

Where can a charging pile be installed?

Floor-mounted charging piles are suitable for installation in parking spaces that are not close to walls. Wall-mounted charging piles are suitable for installation in parking spaces close to walls. 2. Charging piles can be divided into public charging piles and special charging piles according to the installation location.

What is the protection level of a charging pile?

Charging piles are generally constructed in conjunction with parking spaces in parking lots (garages); the protection level of charging piles installed indoors should not be lower than IP32; the protection grade of charging piles installed outdoors should not be lower than IP54.
