

Chilean lithium energy storage power supply customization company

Overview

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

Why is lithium a strategic material for Chile?

In addition, there are two fundamental reasons to consider lithium as a strategic material for Chile. The first is that lithium, in addition to its traditional uses from the last century, has become an essential energy material since the 21st century.

Who owns the lithium industry in Chile?

Currently, the primary players in Chile's lithium industry are SQM, accounting for approximately 65% of production, and Albemarle, holding 35%. Both companies operate in the Salar de Atacama, where they control 34% of the world's lithium supply, equivalent to approximately 44 000 tons.

What is a lithium project in Chile?

Three salt flats named Aguilar, La Isla, and Grande make up this project, which seeks to diversify Chile's lithium production beyond its existing Salar de Atacama region. The latest announcement signals a new development phase for lithium in Chile through joint public-private partnerships and cutting-edge technological solutions.
