

# **China-Ukraine Large Energy Storage**

## Overview

---

How big is China's energy storage capacity?

State Grid Corp of China currently has a scale of 36.80 million kW or 77.56 million kilowatt-hours of new energy storage, with 95 percent of this capacity becoming operational over the past three years, underscoring the accelerated pace of energy storage deployment across China.

Will a new battery storage facility strengthen Ukraine's grid?

Sept. 10, 2025. (Bohdan Nazarenko/DTEK) Ukraine's biggest private energy firm, DTEK, has launched a major battery storage facility that will bring power to hundreds of thousands of homes and strengthen the grid ahead of expected Russian attacks this winter, the company said.

Why is energy storage important in China?

"As China progresses towards carbon-peak and carbon-neutrality goals, new energy is growing rapidly, making energy storage essential for building a modern power system as a key tool for flexible power adjustment amid pressure for power supply in peak times," the NEA said in a statement on Friday.

Is China's energy storage sector growing?

According to the report, China's energy storage sector has maintained a rapid growth momentum from 2023, with new energy storage capacity expanding from 8.7 million kilowatts in 2022 to 31.39 million kW last year. On the other hand, new energy storage plants in China are increasingly shifting toward centralized, large-scale installations, it said.
