

Comparison of a 10kW Solar Container Generator with a Traditional Generator

Overview

Can a 10kW solar generator power a house?

A 10kW or more solar generator is a great choice if you want to power your entire home or run several large appliances. The problem is that such a solar generator is hard to find. Most solar generators top out at 3,000W to 5000W. To get 10,000W of AC power, you typically have to install a permanent solar system with a powerful 10kW inverter.

How much does a 10kW solar generator cost?

But generally, a 10kW+ solar generator can power most homes. Note, however, that if you have a 120V AC solar generator, it will not power any 240V appliances and systems. How much does a 10kW+ solar generator cost?

10kW+ solar generators typically start at \$5,000. But they can cost over \$10,000 if they have multiple battery packs.

Does a 10kW+ solar generator have a high battery capacity?

Charging Performance 10kW+ solar generators tend to also have high capacity. This can be an issue when it comes to recharging the large battery or batteries. If the solar generator charges slowly, it'll take forever to recharge the batteries. This can be a big issue if you are off-grid.

How much power can a solar generator run?

A high power rating of 2,000 or even 3,000 watts means little if the battery can deliver only 1,500 watt-hours of charge. Your solar generator should be able to run powerful appliances, but it has to be supported by a decent battery.
