

# **Construction plan for Thimphu large-scale energy storage project**

## Overview

---

What is the Thimphu Structure Plan?

The Thimphu Structure Plan protects steep slopes and hills along the periphery of Thimphu City from intensive development by designating them as E4 precinct.

How big is China's energy storage fleet?

As of June 2025, China's new energy storage fleet had surpassed 100 GW, overtaking the pumped hydro additions for the first time, according to data from the China Energy Storage Alliance (CNESA). To continue reading, please visit our ESS News website.

How big is China's Energy Plan?

The plan is expected to drive CNY 250 billion (\$35.11 billion) in sector investment over three years. China has already outpaced its previous targets. The country reached its 2025 goal of 30 GW two years early and saw explosive growth in 2024 alone, adding 37 GW / 91 GWh of new energy storage – more than doubling total capacity year-on-year.

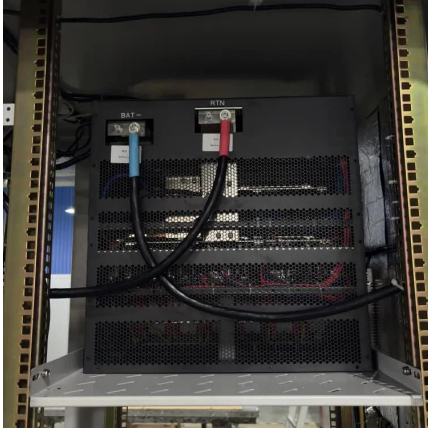

Will China install 100 GW of new energy storage by 2027?

From ESS News China aims to install more than 100 GW of new energy storage – primarily battery storage, excluding pumped hydro – by 2027, according to a new action plan presented by authorities on Friday.
