

Copenhagen solar container communication station wind power bidding

Overview

What is Denmark's largest procurement procedure for offshore wind power?

The Danish Energy Agency has launched Denmark's largest procurement procedure for offshore wind power, marking a significant step towards the country's green transition. This ambitious initiative aims to establish a minimum of 6 GW of offshore wind power by 2030, potentially increasing Denmark's off .

Does Denmark have an offshore wind farm?

As a pioneer in offshore wind, Denmark has a long history of harnessing its favorable wind conditions, launching its first offshore wind farm in 1991. The country currently operates 2.7 gigawatts of offshore wind power.

Why does Denmark not bid on offshore wind?

According to Danish offshore wind developer Ørsted, offshore wind has an “unfavorable risk-reward balance.” Analysts attribute Denmark’s lack of bids in its recent offshore wind energy to a rigid auction system, an inability to adjust to shifting economic conditions, and heightened competition.

How much wind power will Denmark have by 2030?

This ambitious initiative aims to establish a minimum of 6 GW of offshore wind power by 2030, potentially increasing Denmark's offshore wind capacity to over 10 GW with the possibility of overplanting. The procurement procedure is divided into six sites across four key areas: North Sea I, the Kattegat, Kriegers Flak II, and Hesselø.
