

Cost of 20-foot photovoltaic shipping containers for base stations in Southeast Asia

Overview

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.

What is a mobile photovoltaic system?

That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced container technology.

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

How much does container shipping cost?

China-Europe rates are around \$3.70/kg, China-North America at \$5.30/kg, and Southeast Asia-North America at \$4.63/kg. Use the cost calculator and keep up to date with container shipping pricing trends to get a better idea of what your total landed costs will be. China - N. America weekly prices dropped 5% to \$ 5.30/kg.
