Where can I get solar panels in Cyprus?

Flux Energy, based in Limassol, is your go-to for energy solutions in Cyprus. Flux Energy lists local companies specializing in solar panel, solar systems installation and Photovoltaic Solar Panels in Cyprus. Solar panels are used in Cyprus more than in any other country in Europe due to the year-round sunshine the island has.

Why does Cyprus have a lack of solar energy?

**Lack of Storage:** Unlike other countries with hydroelectric dams or large battery storage facilities, Cyprus has nowhere to store excess solar energy during peak hours. **Grid Congestion:** In some areas, distribution lines can't handle the extra electricity being pushed into them, forcing operators to curtail solar production.

What is happening with solar energy in Cyprus?

**Curtailment Issues & Grid Limitations** - Recent articles highlighting curtailment of excess solar energy due to grid instability. The magnitude of the curtailment problem in Cyprus - In 2024, 29% of green electricity was curtailed. This is equivalent of the total annual consumption of approximately 28,000 households.

Will Cyprus' electricity grid handle two-way flows of electricity?

The electricity grid in Cyprus was designed decades ago (1970s) to handle power from large, centralised fossil-fuel plants that generate electricity and push it one-way toward consumers. But with the rise of rooftop solar and commercial PV farms, the system is now expected to handle two-way flows of electricity—something it simply wasn't built for.
