

# Czech communication 5g base station pilot

## Overview

---

What is the implementation and development of 5G networks in the Czech Republic?

The Implementation and Development of 5G Networks in the Czech Republic document is a sub-strategy focused on a specific area of constructing and developing infrastructure for high-speed communication. It is part of the Digital Czech Republic concept and the Innovation Strategy of the Czech Republic 2019-2030.

Is the Czech Republic ready for 5G?

The situation in the Czech Republic is also in line with the global development, because at present, only NSA networks have been deployed around the world. The second phase is to run purely networks that fully comply with the upcoming specifications for 5G standalone (SA) networks.

Which MNOs have 5G coverage in the Czech Republic?

Vodafone covers over 96.47%, O2 over 93.56% and T-Mobile 93.40% of the population in the Czech Republic (data as of 1 November 2024). The three MNOs, in cooperation with the Prague Public Transit Company (DPP) and CETIN, have also deployed 5G coverage in all stations across the Prague metro network.

How much power does a 5G base station use?

The power radiated by mobile networks base stations transmitters in bands, which are (or will be) used for 5G technologies, is rather low (power delivered to 2G-4G base stations regular antennas is usually of a maximum 20 W, and in bands over 26 GHz will be lower than 1 W).
