## Overview

---

Does Bangladesh need a solar power plant?

Bangladesh is shifting focus to increase solar capacity through mid-size and utility-scale power plants as its fossil-fuel dominated grid expands, surpassing participation in the world's largest off-grid solar program.

Does Bangladesh have a solar home system?

Bangladesh's Solar Home Systems (SHS) program, which delivered off-grid power to households lacking access to the national electricity grid, brought significant benefits to locals, according to a 2021 World Bank report. However, SHS saw declining support as Bangladesh's grid expansion efforts gained momentum.

Will Bangladesh switch to solar power?

At the time, Islam's home was still powered by SHS. But if grid connections become available, he said, "we will switch as well." Bangladesh's grid is still 98% powered by fossil fuels, primarily gas and oil, but solar electrification efforts are now focused on larger solar power facilities that will supply the national grid.

When did China start deploying off-grid solar panels?

The country's push to deploy off-grid solar panels began in 2003, with \$1 billion in international financing through the World Bank. Its government worked with 56 partner organizations and offered incentives for rooftop solar installers to install 4.1 million solar systems in remote areas until installations ended in 2018.
