# Direct cast roof with solar panels

## Overview

---

### How to choose a solar roof?

Solar rooftop panels are installed using solar mounts. Identifying the area for solar panel installation helps determine how many solar mounts you need. Also, while identifying the total rooftop area, you can specify the extent of shade-free area. Ascertain the endurance capacity of the roof, as the solar panels are bound to weigh heavy on it.

### What is a roof-mount solar system?

Here are a few considerations before putting your finger on one of them: A roof-mount solar system is a photovoltaic (PV) system that generates electricity through solar panels mounted on a rooftop. Owing to their easy installation and low maintenance, roof-mount solar panels are ideal for residential and commercial purposes.

### What is a roof-mounted solar panel installation?

Roof-mount solar panel installations are less intrusive and invasive, and there is no need for extensive pre- and post-installation work or construction. Roof-mounted solar panels add aesthetic appeal and blend seamlessly with roofs, making them ideal for residential rooftop surfaces.

### How much does a solar roof cost?

The cost of a solar roof varies, but averages between \$15,000 and \$40,000 depending on the size of the solar panel system. Getting quotes from a solar company or checking with the National Renewable Energy Laboratory can give better cost estimates. How much money do solar panels save per month?
