Overview

How does a solar AC work?

In simple terms, solar ACs use solar panels to power the air conditioning system. Solar panels collect energy from the sun. They convert this energy into power. That power either goes directly to the air conditioner or to a battery where it's stored until the AC needs it.

Do solar air conditioners work?

Not only can solar-powered air conditioners reduce greenhouse gas emissions, but they can also help slash utility bills. And solar AC owners won't have to worry when utilities employ rolling blackouts on the hottest days to avoid grid overuse. Their ACs work independently of the power company.
