# Does the UPS battery cabinet need a separate room

## Overview

---

Do I need a separate battery room?

With larger industrial uninterruptible power supply solutions it may be worth considering a separate battery room to allow the UPS batteries to be kept at the optimal temperature while allowing the UPS room to have wider temperature tolerances. Lithium ion battery cabinet Conditioned free cooling.

Should a ups be enclosed in a cabinet?

UPS units should not be enclosed in unventilated cabinets. Temperature Control: Maintain an ambient temperature between 20-25°C for optimal battery performance. Dust & Humidity Control: Keep the UPS room clean and dry to avoid short circuits or reduced efficiency. Providing complete UPS solutions for over 10 years.

Do you need a battery for an ups?

As an example, your UPS system's battery – lithium-ion or VRLA – will need servicing. They also need to be kept away from potential hazards like particularly high or low temperatures or water. What size should a UPS room be?

The most important factor in sizing a room for an Uninterruptible Power Supply is space around the equipment.

Do I need a separate room for the battery-pack?

If you do not need to use a separate room for the battery-pack, consider placing them in a room where the H<sub>2</sub> concentration can never reach dangerous levels (circulated air, consult your ventilation and fire safety engineers). My advice is free of charge and of respective quality.
