

EU solar Energy Storage Charging Project

Overview

How many battery energy storage systems were installed in Europe in 2024?

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

Will Solarpower Europe deploy 780gwh of battery storage?

Despite this surge, SolarPower Europe said the continent is not on track to deploy the 780GWh of battery storage it claimed will be needed to ensure flexibility, reliability and decarbonisation of the energy sector in line with policy targets by 2030.

How can European policymakers help the battery storage sector?

ecomendationsHow can European policymakers help the battery storage sectorBattery storage systems are essential for strengthening the EU's energy security and competitiveness by enhancing flexibility, providing ancillary services to secure the grid, maximising the use of renewable energy, and effectively dealing with energy pr.

What is the battery storage Europe platform?

SolarPower Europe has launched the Battery Storage Europe Platform, a significant new initiative aimed at strengthening the business case and regulatory framework for battery storage across the European Union.
