## Overview

---

Do photovoltaic curtain walls improve the cost-effectiveness ratio?

After sensitivity analysis of the cost of photovoltaic curtain walls and the efficiency of solar panels, it was found that as the cost increases, the economy of photovoltaic curtain walls gradually deteriorates, and improving the efficiency of solar panels can improve the cost-effectiveness ratio of each facade.

Can photovoltaic curtain wall array be used in building complexes?

Xiong et al. [ 31] develops a power model for Photovoltaic Curtain Wall Array (PVCWA) systems in building complexes and identifies optimal configurations for mitigating shading effects, providing valuable insights for the application of PVCWA systems in buildings.

Why are glass curtain walls used in modern architecture?

In present times, the use of glass curtain walls in modern architecture has witnessed a surge, owing to the progress of urbanization. Glass curtain walls offer the benefits of being lighter in weight and possessing higher transparency levels [ 23 ].

What is the service life of photovoltaic curtain walls?

The service life of photovoltaic curtain walls is 25 years. The assumptions for life cycle cost (LCC) calculation include equipment procurement costs, operation and maintenance costs, energy costs, repair and replacement costs, etc. These assumptions can be adjusted based on specific projects. The calculation formula is as follows:

## Economic benefits of solar glass curtain walls
