

Energy Storage Container Lighting

Overview

Why is shipping container lighting important?

Proper shipping container lighting is essential for maximising visibility, safety, and functionality inside and around your container. Whether your container is used for storage, a workspace, or a living space, having the right lights for shipping containers ensures that you can operate efficiently, even in low-light conditions.

What types of shipping container lights are available?

At QuickFit Container Accessories, we provide high-quality shipping container lights, including energy-efficient magnetic shipping container lights, complete shipping container lighting kits, and sustainable shipping container solar lighting solutions. No matter your container setup, we have the ideal lighting solution to suit your needs.

Are solar-powered shipping container lights energy efficient?

All our powerful lighting options are energy efficient and designed to meet the standards of both public and private projects. Our durable, solar-powered exterior shipping container lights are three times brighter than standard solar lights. They enhance the security around the outside of your container or office.

What are led shipping container lights?

LED shipping container lights provide specialized illumination solutions for the unique challenges of container storage, workspace, and mobile applications. These compact, high-efficiency fixtures deliver optimal light distribution within the confined 8-foot ceiling height and narrow dimensions of standard 20-foot and 40-foot containers.

LED Shipping Container Lights

What Is The Best Type of Storage Container Lighting? What Power of Led Lights Should Be Used Inside A Shipping container? How Many Led Lights to Properly Light A Shipping Container? Do You Offer Led Wet Location Lighting For Shipping Containers? Because shipping containers are long, narrow, and have relatively short ceilings, we recommend a surface mount fixture. Linear strip fixtures are ideal as they will lighten up a larger area and the light will be generally more balanced. A good secondary option would be a ceiling-mounted canopy light or low bay fixture.
