

Factory installation of solar panels

Overview

Can solar panels be installed on a factory roof?

The roofs of factories are often the ideal place to install solar panels. As factories are energy-intensive buildings, installing a solar PV system on the roof of a factory ensures free power can be generated to run everything underneath it.

How to install a solar panel system?

It's easy to set them in the right position, thanks to mounting kickstands. It is thus convenient to install a solar panel system using portable modules. Portable folding solar panels are another, more compact option. A battery is needed to use solar energy during the night, and a solar controller for safe battery charging.

How much space do industrial solar panels need?

Depending on the efficiency of the panels, 4-5 acres of open land or 10,000+ sq. ft. of rooftop space are typically required. Q2: Is net metering available for industrial solar?

.

How can a factory or commercial property go solar?

Here's a step-by-step overview of how your factory or commercial property can go solar: A solar installer performs a detailed audit of your facility, checking: The installer designs a tailored system based on the audit findings. The installer helps you secure local DISCOM permissions, net metering agreements, and necessary compliance approvals.
