

# **Fiji Office Building Energy Storage Project**

## Overview

---

What is EPC solar doing in Fiji?

Indigenous-owned EPC Solar said the projects are part of a pipeline of more than 40 potential installation sites in Fiji which is targeting 100% renewable energy by 2036. The company also plans to expand its operations into New Zealand and then other Pacific nations – islands it says will bear the brunt of climate change and rising sea levels.

How many solar PV installations are there in Fiji?

Around 150 rooftop solar PV installations are also operating in Fiji, accounting for about 580 MWh per year, although the majority are very small projects. EFL expects generation to increase to 1,000 MWh in the coming years.

Does Fiji have a power development plan?

EFL has similarly developed a 10-year Power Development Plan (PDP), with nearly US \$1 billion in investment foreseen in the next decade. Fiji's 20-Year NDP (2017-2036) provides a vision for "Transforming Fiji" towards an even more progressive, vibrant, and inclusive society.

Can Fiji achieve 100 percent electricity access by 2026?

Furthermore, CIF financing for rural electrification programs plays a crucial role in achieving Fiji's goal of 100 percent electricity access by 2026, given that, without donor funding, the rate of return on these projects would most likely not be sufficient to attract private sector investment.
