# Fimer Solar Inverter

## Overview

---

What is a Fimer solar inverter?

FIMER solar inverters are equipped with advanced and innovative technologies, ensuring efficient energy conversion and optimal system performance. The inverters feature a compact and lightweight design, optimizing space and making them suitable for a variety of installation environments.

Does Fimer offer a warranty on a solar inverter?

FIMER committed to honouring all existing ABB warranties. Under the new FIMER branding, there was a ten year full replacement warranty on the UNO-DM range single phase solar inverters and five years on three-phase FIMER string inverters; which could be extended to 10 years for an additional sum.

Does Fimer make a string inverter?

FIMER offers string and hybrid inverters for the U.S. solar market. It also manufactures accompanying at-home EV chargers, but they are not available in America. FIMER's UNO-DM string inverter comes with a wide range of capacities; your solar installer will be able to determine the right size for your specific solar system.

How much does a Fimer solar inverter cost?

You'll find that as FIMER only recently acquired ABB, the solar inverters are still sold under that name and feature ABB branding on the product. Pricing hasn't been formally announced but their solar inverters are likely to cost from £625 for the smallest kW models then upwards. Get Free Solar Panel Quotes: Get quotes and compare prices.

## Fimer Solar Inverter

Final Word on Fimer  
FIMER is a global company serving residential, commercial, and utility sectors. Founded in 1942 by Arturo Sottocorno, the business is the fourth-largest solar inverter supplier in the world. The company achieved this status in 2020 after acquiring Asea Brown Boveri's (ABB) solar inverter business. Although FIMER mostly operates from its Vimercate, Italy headquarters, it also has offices in the United States, Australia, and South Africa. The company's products include solar inverters, battery storage systems, and EV charging stations. FIMER is committed to sustainable energy solutions and has received numerous awards and recognition for its work in the industry.
