

Financing for a 5MWh Off-Grid Solar Container Project for Island Use

Overview

Can off-grid solar power increase energy access?

As a result, 650 million people globally, and 570 million in Sub-Saharan Africa, are expected to remain without electricity access by 2030 (Tracking SDG7 Report 2019). Off-grid solar (OGS) energy provides an opportunity to increase energy access.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

Do off-grid solar companies need financing?

Adequate financing for off-grid solar companies is necessary to expand solar power for those who need it most. A range of financing options— including frontier concepts coming from the “fintech” revolution—are applicable to this field.
